- simple handling, convenient and rapid filter change
- single-use system makes handling and material planning easier

We can help you make steam

Cooking and baking free from interruptions is essential in the catering industry. Downtime must be avoided at all costs, as every interruption loses guests and money. Everything must run quickly and easily. Water optimisation for combi-steamers and ovens offers the ideal solution. This is the reason behind the popularity of filter cartridges from BWT water+more: the single-use system eliminating complicated return procedures, the connection head for all filter sizes, small dimensions ideal for extremely limited kitchen space, or the rapid and completely unproblematic filter change. It is often the small things which make work so much easier. And if the price is right, what better way to make steam than with filter cartridges from BWT water+more? Discover convenience and economic viability in the kitchen with BWT water+more to ensure your success in the catering industry.

Products for water optimisation

In Europe drinking water satisfies the highest quality standards. However, water with a low carbonate hardness is better for combi steamers and ovens. BWT water+more fulfils the high demands of the catering industry with customised solutions for water optimisation – for individual water requirements ranging up to 20,000 litres*.

Filter cartridges for mains water connection

- Extremely compact – whatever the installation situation
- Practical – horizontal and vertical installation possible
- Flexible – one connection head for all sizes of filter
- High capacity – for greater efficiency
- Activated carbon fleece – improves taste
- 5-stage filtration – for optimum particle-free water
- Capacity up to 9,100 litres*

* With a standard setting and carbonate hardness of 10 °.

BWT – the leading international water technology group

The BWT Group is present all over Europe with subsidiaries and affiliated companies. Water and environmentally-friendly technology, as well as international sustainability management with regard to customers, employees, the environment, market partners and the community, reflect the responsible approach at the heart of the company. The essential life-force water, and the increasing demands on safety, hygiene and health in everyday life pose a number of new challenges. Building on the strong European market position, BWT has worked consistently to turn the vision:

Water technology for a better life!
