Particles	✓	✓
Foreign taste	✓	✓

Only with BWT bestcup PREMIUM:

⊕ Protects the coffee machine against gypsum deposits	✓	—
⊕ Optimised coffee extraction (brewing process)	✓	—

Perfect coffee every time thanks to BWT magnesium technology

Improved protection for your valuable coffee machine

Even pure drinking water can contain both lime and gypsum, which result in deposits in the coffee machine. By reducing the calcium content and increasing the magnesium content, BWT bestcup PREMIUM provide outstanding protection for valuable machine technology – regardless of the local water quality.

Professional quality coffee at home

High-quality coffee beans and modern machine technology are essential for preparing outstanding coffee at home. But there is a third component that is crucial to the perfect quality in the cup: the water. Even the excellent drinking water in Europe can contain a lot of lime or gypsum, too few minerals or too many particles from the pipes. With its new bestcup PREMIUM tank filters, BWT water+more offers a professional system for water optimisation in private households. The patented BWT magnesium technology adds the taste-carrying mineral magnesium to the water, for the best coffee taste and a perfect crema.

BWT bestcup PREMIUM is available for a range of high-quality fully-automatic coffee machines.

Why magnesium?

The mineral magnesium has very special properties. It gives high-quality mineral waters their typical, mineral-rich taste. During the coffee brewing process, a high magnesium content ensures optimum extraction of all the key components.

Optimum coffee taste in every cup

Any good coffee can only taste as good as the coffee water used to make it. That is why tank filters from BWT water+more work in a targeted way to reduce the lime and gypsum content of the water and increase the magnesium content in relation to calcium. The result is the best coffee water for an optimised extraction process that gets the very best out of the coffee.

Recommendations for use and overview of models: BWT bestcup PREMIUM in-line tank filter¹

BWT bestcup PREMIUM	Water tank adapter	Coffee machines
BWT bestcup PREMIUM SAPHIR S		Fits all the coffee machines listed below with AQUAPRIMA ² and INTENZA ³ water filters: SAECO ² Magic range (Magic de luxe, Magic Comfort, Magic Comfort Plus)/SAECO ² Royal range (Royal Digital, Royal Digital Plus, Royal Professional, Royal Cappuccino)/SAECO ² Talea, Talea E.S. range (Giro, Giro Plus, Ring, Ring Plus, Touch, Touch Plus)/SAECO ² Syntia range (all models)/SAECO ² Office One/GAGGIA Platinum range (Vision, SwingUp, Swing, Vogue)
