best water technology

## Water optimisation for low-salt water

- Perfect mineralisation for your water
- Free from particles, unpleasant tastes and odours
- Filter capacity: 10,000 litres
- Flexible: suitable for use with the BWT water+more standard filter head

### BWT bestmin filter cartridges

Optimising the mineral content of the water is vitally important for any hot or cold drink. Often if the water tastes “flat”, it is lacking in essential minerals. Even if large quantities of coffee are added, the drink can have a stale or even sour taste. The coffee grounds may also swell excessively, which can have a negative impact on the brewing process in the coffee machine.

BWT bestmin filter cartridges and high-end BWT technology can restore the mineral balance in the water. The filter medium, an ingenious combination of natural minerals and innovative activated carbon fleece, adds minerals to the water that are essential for achieving the perfect taste and, at the same time, eliminates any particles, unpleasant tastes or odours. Regardless of whether your water originates from a mountain lake low in minerals, a reservoir or a reverse-osmosis system, you can always enjoy top quality water thanks to the unique BWT bestmin filter cartridge water optimisation system.

### BWT bestmin filter cartridges

#### – optimal taste

- For perfectly mineralised water
- For hot and cold drinks

### Top technology

- Exceptional BWT water+more filter medium for optimal mineralisation
- Innovative activated carbon fleece for the best possible taste
- Simple one-way system

## BWT bestmin – part of an extensive product range

The BWT water+more solution can satisfy almost any water optimisation requirement in the catering sector.

All products feature a tried and tested universal filter head that includes an automatic shut-off valve, return valve as standard and bypass setting directly on the filter head. Each filter cartridge is compact and space-saving and can be replaced quickly and easily.
